Animal Reproduction - Instructions to authors

The Animal Reproduction–AR publishes original scientific papers and invited literature reviews, with a goal of contributing to a better understanding of phenomena related to animal reproduction.

All correspondence should be sent to:

Animal Reproduction
Editor
Alameda das Princesas 1275 – Bairro São José
31275-180 – Belo Horizonte, MG – Brasil
Tel.: +55 (31) 3491-7122 - Fax: +55 (31) 3491-7025
E-mail: animreprod@cbra.org.br

Submission of Manuscripts

All manuscripts must be original and copyright should be transferred to the AR. The authors are entirely responsible for all data, concepts and information contained in the article. Manuscripts should be sent preferentially by email or by regular post on a PC readable CD-ROM, properly identified and accompanied by a copy of the written manuscript. Illustrations should be sent as separate files.

All manuscripts must be written in Standard American English. We recommend Merriam-Webster’s Dictionary (Merriam-Webster’s Online: http://www.m-w.com/) for spelling check. Authors whose native language is not English are strongly advised to have their manuscripts checked by a reviewer familiar with scientific language and vocabulary. Manuscripts not written in acceptable Standard English will be returned to the author before being sent to the scientific reviewers. Manuscripts accepted for publication will be submitted to a final review of English by the Journal and the final version will be sent to the author for approval. The manuscripts that are not accepted will be returned to the authors. The AR Editors goal is to have the first decision about the acceptance or not of the manuscript in a time period of thirty days.

Units of measurements, Abbreviations and Symbols

Units of measurements must be used according to the international System of Units. Abbreviations and Symbols – Avoid them unless using standard units of measurement.

Complementary Information

The author is entitled to ten reprints. Copies and translation of any article for commercial use are prohibited and publication in other scientific journals must be approved by the AR.

Revision Process

Manuscripts will be submitted to at least two reviewers and will be returned to the authors for final editing according to the reviewers suggestions. The revised manuscript should be sent to the Editor.

Preparation of Manuscripts

1. Text Format and Files: Type all pages to A4 (21.0 x 29.7), with 3 cm margins, Times New Roman source 12, continuously and without formatting, double spaced, with numbered lines and numbered pages. The electronic file (.doc) should be formatted to MICROSOFT WORD (6.0 version or superior).

2. Manuscript Sections

i. Title page
ii. Abstract
iii. Introduction
iv. Materials and Methods
v. Results
vi. Discussion
vii. References
viii. Acknowledgements
ix. List of abbreviations used
x. Tables
xi. Figures

3. Title page: The title should be succinct but include the study design and major topics.

a) Title words should be in bold, with only the first letter of the first word in upper case.
b) Author names are to be listed below the title, only the surname in full (first and middle names will be represented by the first letter followed by a period). Follow each name with exponents in Arabic numerals to indicate affiliations and addresses (e.g.: R.A. Hess¹; K. Carnes²).
c) Addresses should be listed below the author names and in numerical order.
d) Corresponding author should be listed next with complete mailing address, phone and fax number, and email address.
e) Article type: indicate the area in which the article fits best: Basic Research, Biotechnology or Applied Research.
f) Running title: no more than 50 letters, including spaces.

4. Abstract: State clearly the purpose of the work, indicate the methods used and summarize conclusions. Limit: 300 words. Keywords should be listed after the abstract. Maximum of 5 keywords.

5. Introduction: This section should provide background information leading up to the hypothesis tested. The section should end with a very brief statement of the objectives of the work.
6. **Methods:** Should include the design of the study, type of materials involved, number of animals per group, a clear description of all methods used and/or clear references to published methods, and the type of analysis used.

7. **Results:** The results section may be broken into subsections with short, informative headings. State clearly and objectively the main results found.

8. **Discussion:** This section may be broken into subsections with short, informative headings. The discussion should be focused on the results found. It is recommended that the main conclusions supported by the research data be stated as a last paragraph.

9. **Acknowledgments:** Should be briefly expressed. Grant support with the author initials (i.e., DHP) should be indicated in this section.

10. **Tables:** A set of alphanumerical data that is organized in lines and columns. Begin each table on a new page. Tables must be as simple as possible and organized in lines and columns. Begin each table on a new page. The table legend, at the top, must be clearly and objectively the main results found.

11. **Figures and figure legends:** Any illustration that contains line drawings, photographs, graphics, schemes, fluxograms etc. are considered as figures. They should be identified and sent in separate file. The list of table titles and figure legends should begin on a new page within the text. In the text refers to the figures in the numerical order that they are listed; i.e., Fig. 1, Fig. 2, Figs. 1-2, etc. The legends of the figures must be sent separately.

12. **References:** Begin the reference list on a new page. Please see below examples for references cited in the text and for the reference list.

**TEXT CITATION** - Indication of the source parenthetically after the citation in order to avoid interruption in the sequence of the text. In case the names of the authors are integrated in the text, the date of publication is mentioned between parenthesis, after the name of the author, according to the examples:

a) sole author: (Ginther, 1992) or Ginther (1992).
b) two authors: (Varley and Foxcroft, 1990) or Varley and Foxcroft (1990).
c) more than two authors: (Quintero et al., 2000) or Quintero et al. (2000).
d) more than one paper cited: (Varley and Foxcroft, 1990; Ginther, 1992; Gastal et al., 1999a; b; Quintero et al., 2000) or Varley and Foxcroft (1990); Ginther (1992); Gastal et al., (1999a; b). Quintero et al. (2000), always cited in ascending chronological order.

**REFERENCE LIST** - Cite only referred, published work. Use "in press" only when formal acceptance has been granted. References must be listed in alphabetical order.

- **For PERIODICALS**
  
  
  
  
  

- **For OTHER DOCUMENTS than periodicals**
  
  
  
  

- **For ELECTRONIC DOCUMENTS**
  
  **CD-ROM**
  
  
  **Journal article on the Internet**
